Subject: FYI: status of climax; Corps File No. SPK-2013-00045

Karen:

I checked on the status of the Climax project. Lesley McWhirter, Corps project officer sent the attached response.

1. Since this project has potential to be tricky, I believe it would be beneficial for a regional representative to go to the field verification. This would be a day trip for someone in the Region. I believe that Brent would be willing to go to Climax for the field verification. I believe Billy is also interested in going to the meeting.
2. I have asked Lesley to send the revised wetland delineation report to the Regional office as soon as the consulting firm, Bikis, submits it to the Corps.

Toney

Subject: status of climax

Lesley:

EPA HQ called to check on the status of the Climax JDs and permit. How is the permit process going? On the call there was mention of a site visit, has that occurred? Is it possible for you to provide me with a short discussion on the status?

Thanks

Toney Ott
